

Certificate

of completion

This certifies that
Ilona Chamoun

has successfully completed the
Java Backend Development Training

Duration:

16 hours

Completed on:

12/8/2025

Key Achievements:

- Mastered Java programming and object-oriented design principles
- Built backend systems following RESTful standards and integrated with relational databases
- Applied Spring Boot for rapid application development, leveraging features like dependency injection, autowiring, and the use of beans for modular architecture
- Understood and implemented microservices architecture to design scalable, maintainable backend systems
- Used version control tools and deployment practices for real-world backend development
